

# SANTHOSH.R

SOFTWARE DEVELOPER

## Work Experience

**React Developer,**  
**Fuzionest Private Limited Coimbatore**

Jan 2023 - Present

### **Pasubot(Product)**

npm package-<https://www.npmjs.com/package/pasubot1>

Description: Front End – [React](#), Database – [Supabase Config](#)

Pasubot is a comprehensive CRUD operation npm node library designed to facilitate seamless integration with both React and Next.js projects. This library offers a well-designed and intuitive user interface, allowing developers to easily perform add, update, and delete operations. The API configuration is managed by Supabase, providing a robust and scalable backend solution.

### **Warehouse Management System(Client: Bosch Service Team)**

Description: Front End – [React](#), Database – [MongoDB](#)

The Warehouse Management System (WMS) is a specialized application developed for the Bosch Service Team to efficiently manage and monitor warehouse operations. The system includes a dynamic dashboard that allows users to update and locate products within warehouse racks. It is designed to cater to various roles, including gate security personnel, warehouse managers, and warehouse customers, ensuring a streamlined and secure management process.

### **RSL(Client Dubai Service team)**

Description: Front End – [React](#), Database – [MongoDB](#)

RSL is a comprehensive cab booking system developed for the Dubai Service Team, featuring both a mobile app and a website. This application serves customers, drivers, and corporate clients, offering a seamless experience for booking and managing travel within Dubai. With advanced features such as real-time tracking, RSL ensures a reliable and efficient service for all users.

**React Internship,**  
**Mallow Technologies Karur**

Mar 2023- Oct 2023

### **Post Dashboard**

Description: Front End – [React](#), Database – [SQL](#)

The Social Post Dashboard is a web-based application designed to manage and monitor social media posts. It provides users with a centralized interface to create, schedule, and analyze posts across various social media channels.
